United States.

10 Dec. 1894.

Dear Sir:

I write to thank you  
for the mathematical  
memoirs which you sent  
me in response to my  
pamphlet on space-analysis.  
And now I have to  
thank you for a copy  
of your very elegant  
*Introduzione alla Teoria  
Matematica della Elasticità*  
I propose to study  
this work fully. The  
subject is evidently  
presented in a clear  
logical manner.

I am glad to find  
that we are both physical  
mathematicians.

I mail along with  
this letter a copy of my  
pamphlet "On the Definition  
of the Trigonometric Functions,"  
and a number of the  
Electrical World which  
contains a sketch of  
my career.

With sentiments of esteem.

Yours truly

Alexander Macpherson
